

BIOECONOMY COMPANY

Dear Partner,

We would like to inform you that we have implemented a new transport registration system at our site, Szabadegyháza. We aim to improve data flow from manual traffic registration to digital one.

As a result we kindly ask You to fill a registration form with the necessary data before the transport vehicle organized by your party is crossing our gate.

HUNGRANA KFT.

COMPANY REG. NO.
07-09-001129

The required data:

- order/ delivery number
- Hauler's company data – as it is stated on CMR - we need to highlight that in case the service provider uses subcontractor(s), the last hauler in the chain must register ref. to CMR clauses
- Driver's data – it can be any official document with a photo (ID card/ driver license/ passport etc.)

There are two ways of transport registration:

1, Anonym

It's a quick way of registration, but later on the given data cannot be modified. It can be useful for those partners who occasionally pick up goods from our site (for example monthly/ bi-monthly one- two shipments only).

2, As a registered partner

Firstly, the hauler needs to register their company. They get a user name and a password. It allows the partners to build their own database of means of transport and drivers. This way they can easily match shipment - truck – driver combinations, of course they are able to modify/ update truck – driver data in case it is necessary, before reaching us.

We classify traffic as:

- inbound/ incoming : raw materials only, not relevant for You
- outbound/ outgoing: Products of Hungrana, not relevant for You
- **other** (which does not carry raw material, neither Hungrana's product)

We've created a web page for handling shipments / registrations:

<https://traffic.hungrana.hu>

(You can also reach it via our homepage: www.hungrana.hu/contact - traffic registration)

Here, You can find a video about registration/ functions/ modifications etc., how to use the page.

In case you have any question or you require support, please contact us via info@hungrana.hu

We kindly ask you to inform your contracted logistic service providers/ haulers /partners.

We believe that the registration does not take more than 5 minutes and as a benefit, it will allow us to speed up our processes.

Thank you for your kind cooperation!

Kind regards,

László Csordás

Logistics and SCM Director
